KM200-220 & A901 Series TECHNICAL SERVICE INFORMATION

The vertical drive shaft KW462404 is now obsolete. This shaft was fitted in all gearboxes manufactured prior to 1992. The shaft can be replaced by the later version KW638857, but as the diameter of the shaft is increased from 12.7mm to 14mm and the coupling with the planet hub assembly changed from a 'small D' to a 'large D'. The following parts must also be changed:

KW638869 - Gearbox lower cover - 14mm bearing
KW650154 - Planet hub kit (hub, cover and nut)

Alternatively while stocks last KW650154 can be replaced with items from the following list:

KW638871 - Planet hub assembly - *NO LONGER AVAILABLE*
KW638895 - Planet hub nut
KW638883 - Cover - white
KW642810 - Cover - grey
KW642822 - Cover - black

Alternatively a complete gearbox KW644533 can be fitted.

The planet hub kit KW616603 (small D drive) is now obsolete. It can be replaced with KW650154 or the alternative items stated above, but the vertical drive shaft and gearbox lower cover will need to be changed as detailed above.

KW353196 - large pulley - 'old type' - *NLA*

KW616653 - Spider drive pulley - *NLA*

The pinion gear (not shown) in gearboxes fitted with a spider drive pulley as illustrated, are now obsolete.

Please use the following parts.

KW614239 - DRIVE PINION ASSEMBLY

KW650104 - LARGE PULLEY & M6 NUT
